MODULE 5

ECOMMERCE

The world of retail has gone from “bricks and mortar” to “clicks and mortar”. Including Ecommerce into your profit stream is smart, fun and easy to do.

Let's get to work!

PASSIVE PROFIT
STREAMS

THE BASICS OF ECOMMERCE

Electronic commerce or “Ecommerce” is the main term used to describe any type of business, or commercial transaction which takes place over Internet.

Ecommerce covers a wide range of businesses. Just like traditional commerce, there are three main areas for e-commerce: B2B, B2C, and C2C.

B2B

(Business to Business)
This involves companies doing business with each other. Think Alibaba.com. They are a wholesale marketplace for global trade.

B2C

(Business to Consumer)
B2C consists of businesses selling to the general public through shopping cart software, without needing any human interaction. Think Amazon.com.

C2C

(Consumer to Consumer)
This takes place with online classified ads, forums or marketplaces where people can buy and sell goods to each other. Think Craigslist.org or Ebay.com.

WHY CONSIDER ECOMMERCE

SOME OF THE BENEFITS OF ECOMMERCE AS A PASSIVE PROFIT STREAM

LIMITLESS GEOGRAPHY

Ecommerce removes your borders and opens your business up to the world.

FREE TRAFFIC VIA SEO

Allows you to compete with the biggest brands online.

GROWTH WITH ANALYTICS

Information from customers provides the ability to target emails, customer experience and niche improvement.

LOWER COSTS

Ecommerce saves in real estate, personnel, marketing and inventory holding costs.

OPEN 24/7/365

In today's world she wants to be able to shop when she wants, how she wants and where she wants. Businesses that cater to that have the best chance at success.

TWO MAIN ECOMMERCE STRATEGIES

01

Sell it first and then purchase
your inventory.

02

Good margins; not great
margins.

03

Buy bulk then resell. Better
margins but higher risk and
hassle.

04

Work directly with overseas
manufacturers and suppliers.

DROPSHIPPING

- Allows you to sell products without holding onto inventory.
- Sell it before you buy it.
- The difference between your wholesale cost and the sale price is your profit.
 - How to calculate your profits:
 - Your Cost = The cost to purchase the product from the supplier at wholesale pricing.
 - Your Sale Price = The price you sell the product at or the desired markup.
 - You could take each item and mark it up say 50%.
 - Your Gross Profit = Your sale price or markup price – Your wholesale cost.
 - Your Merchant Processing Fees (Average of 3%) = Sale price x Your Processing Fee
 - Net Profit = Your Gross Profit – Your Merchant Processing Fees
 - If you offer free shipping or lose money on shipping (Like \$10 Flat Rate Shipping Per Order) Factor that in as well.

DROPSHIPPING

- Example of Dropshipping Product
 - Pretend you are selling a surge protector:
 - Your Cost = \$9.76
 - Your Sale Price = \$14.25
 - Gross Profit = \$4.49 ($\$14.25 - \$9.76 = \4.49)
 - Your Merchant Processing Fees (3% Average) = \$0.43 ($\$14.25 \times 0.03 = \0.43)
 - Net Profit = \$4.06 ($\$4.49 - \$0.43 = \4.06)
- Example of Dropshipping Product
 - Pretend you are selling a skillet:
 - Your Cost = \$13.21
 - Your Sale Price = \$29.95
 - Gross Profit = \$16.74 ($\$29.95 - \$13.21 = \16.74)
 - Your Merchant Processing Fees (3% Average) = \$0.90 ($\$29.95 \times 0.03 = \0.90
*Round Up)
 - Net Profit = \$15.84 ($\$16.74 - \$0.90 = \15.84)
- * Factor in shipping costs.

DROPSHIPPING – SOURCING PRODUCTS

- **You can find dropship suppliers online.**
 - Google search: “Dropship Suppliers”
 - Google search: “product type + dropship”
 - Example: kitchen gadgets + dropship
 - Example: travel bags + dropship
 - Example: survival gear + dropship
 - Find products you would want to carry and call the manufacturer.
 - Visit Amazon.com or your favorite retailer.
 - Make note of the brand names you like.
 - Call and ask if they drop ship.
 - If they don’t dropship ask if they have a wholesale distributor.
- **You will typically need a resellers permit.**
- **Avoid purchasing a dropshipping directory.**
 - Better to find drop ship suppliers on your own.

WHOLESALE INVENTORY

- You need to factor in product storage costs.
- Make sure you have room to inventory.
- Decide if you want to pay for a warehouse who will ship for you.
 - Fulfillment services.
- Typically not the best option for someone starting out in the ecommerce space.
- Amazon Fulfillment can provide you the most effective way to get your products fulfilled.
- If you are shipping products on your own you can look at Uline.com for packing and shipping supplies.

WHOLESALE – SOURCING PRODUCTS

- Buying in bulk increases your profit margins.
- Websites you can look at to source products are:
 - Alibaba.com
 - Most popular site for sourcing products direct from China.
 - Amazing deals.
 - Offers private label opportunities. (Put your own brand name on the product.)
 - Experience in getting products shipped to you at reasonable rates.
 - Minimal inventory required for most products.
 - Requires more experience to source the products.

WHOLESALE – SOURCING PRODUCTS

- Websites you can look at to source products are:
 - Liquidation.com
 - Typically made up from shelf pulls from major online retailers like Target, Walmart, etc.
 - Inventory not consistent at all.
 - Great for eBay sellers.
 - DHGate.com
 - Source quality products from overseas.
 - Free shipping (freight) options from China and other countries.
 - Great margins.
 - Compare to Alibaba on pricing for the same products though.
 - Less experience to make the payments.
 - Pay with a credit card like a normal online merchant.
